How to track ISBN barcodes using Orca Scan?

The Book Tracking solution makes it easy to implement a library management system using smartphones. Orca Scan automatically populates the Title, Description, Author(s), Publisher and Number of Pages each time a book is scanned. Then simply enter a quantity and storage location and you've got yourself a library management system.

Why should you track ISBN barcodes?

When attempting to manage an extensive collection of books, it's more efficient to track them by scanning the unique ISBN barcode, than it is to write down their name and location. The simple reason? It takes less time and eliminates human errors.

Do all books have an ISBN barcode?

No, only printed books sold commercially have an ISBN barcode. eBooks and books sold privately do not need an ISBN barcode. In this case, it's best to type the book title into Orca Scan and have it generate a unique barcode for you automatically. You can use our built-in barcode label designer to design and print barcodes directly, keeping everything organised and searchable.

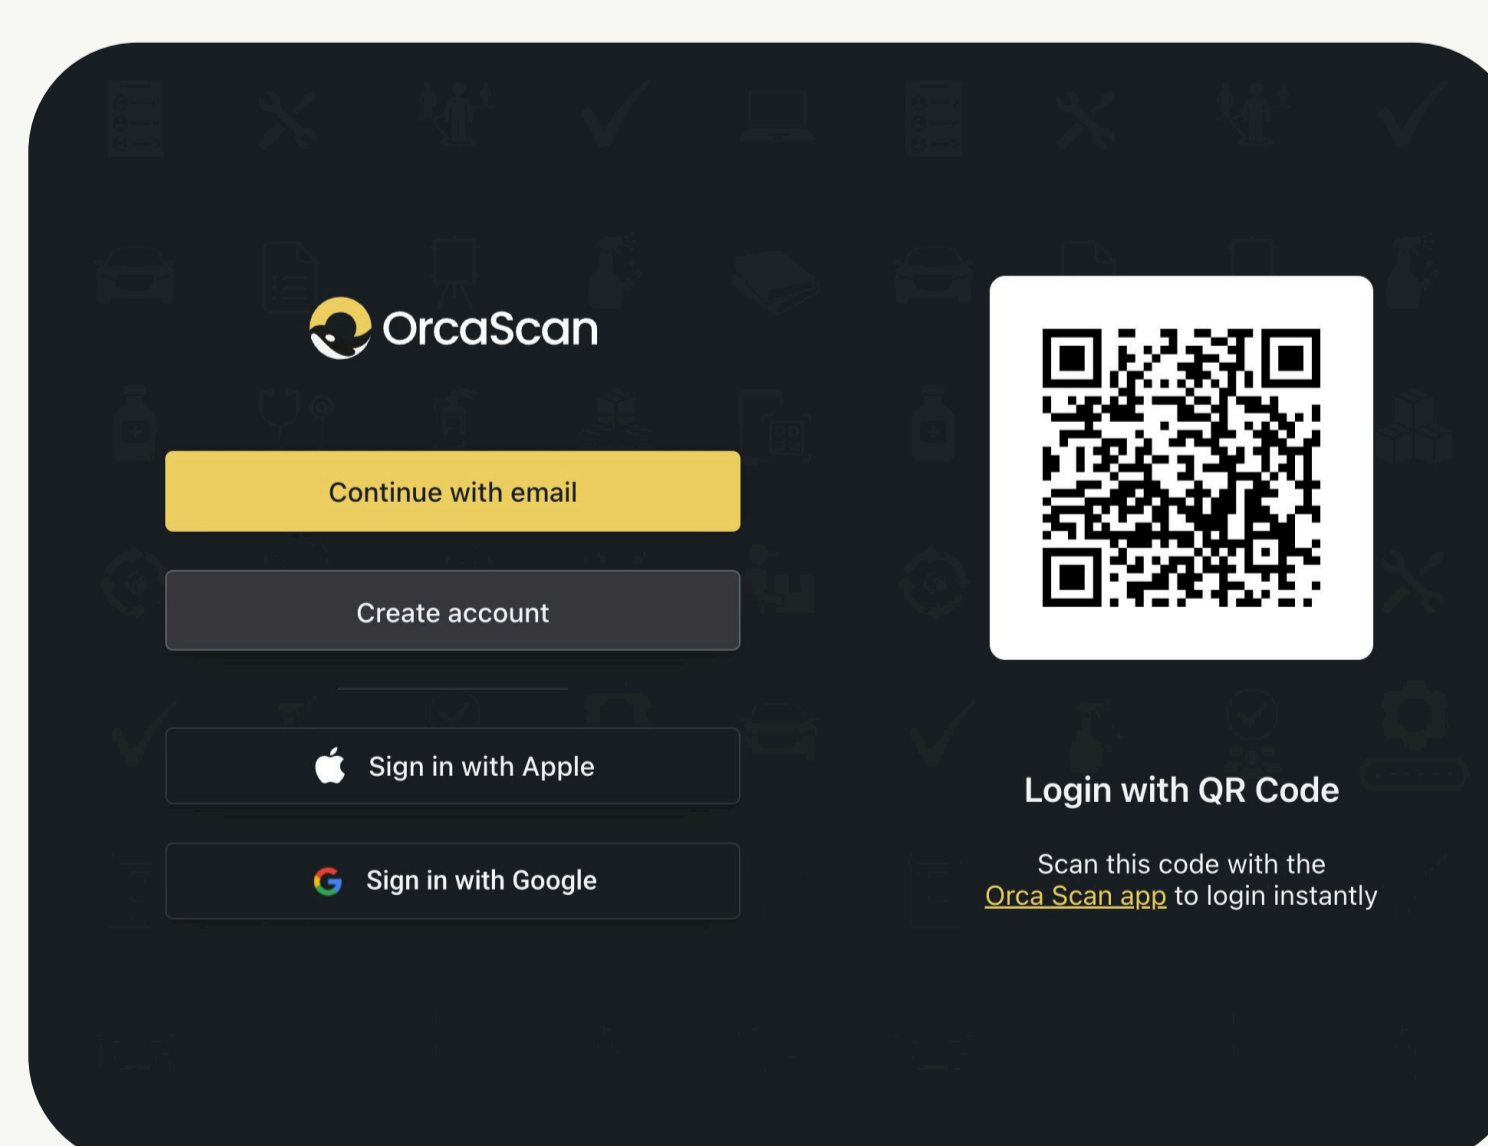

How to install Orca Scan?

Open the camera on
your phone

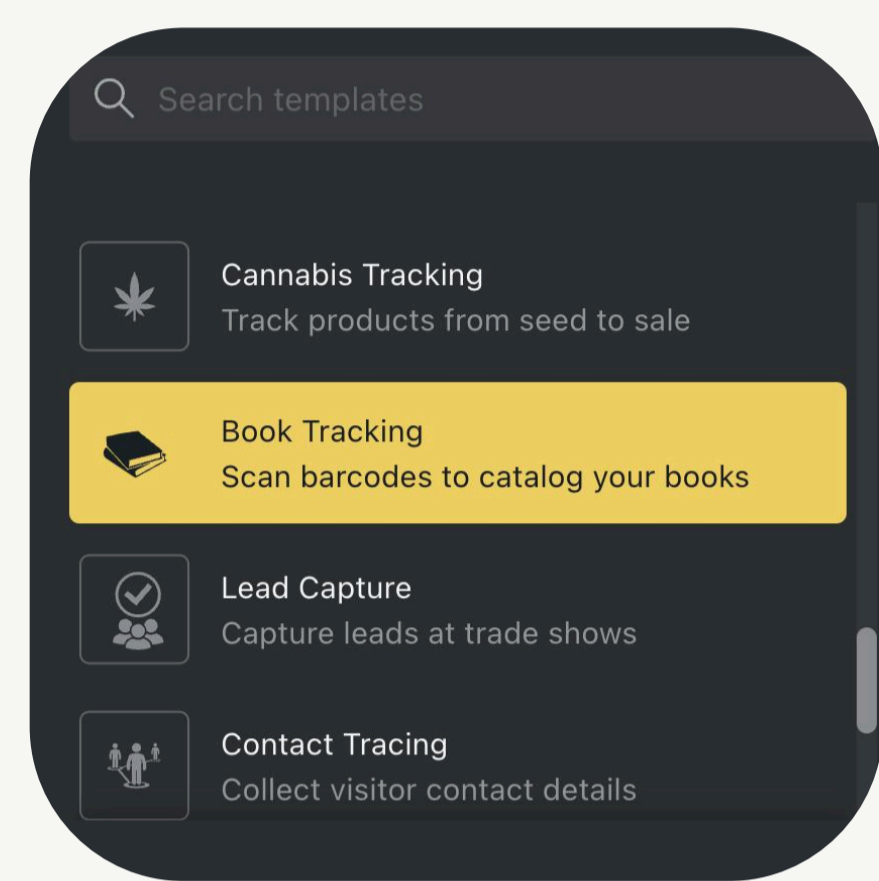

Scan to download the
Orca Scan app

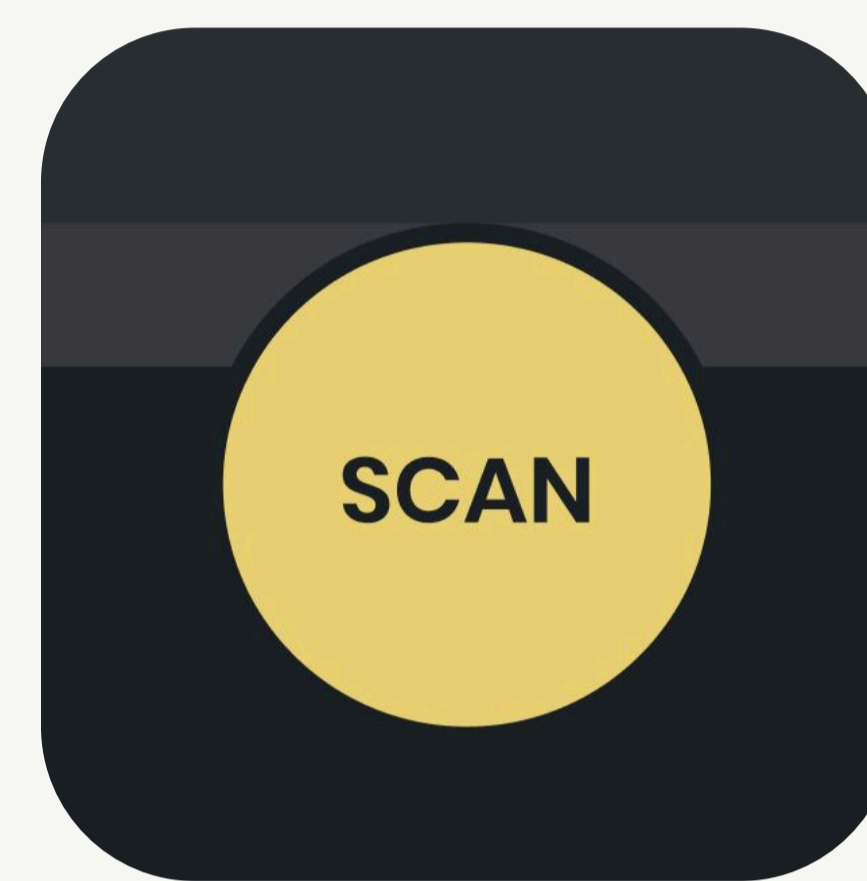

Register for an account

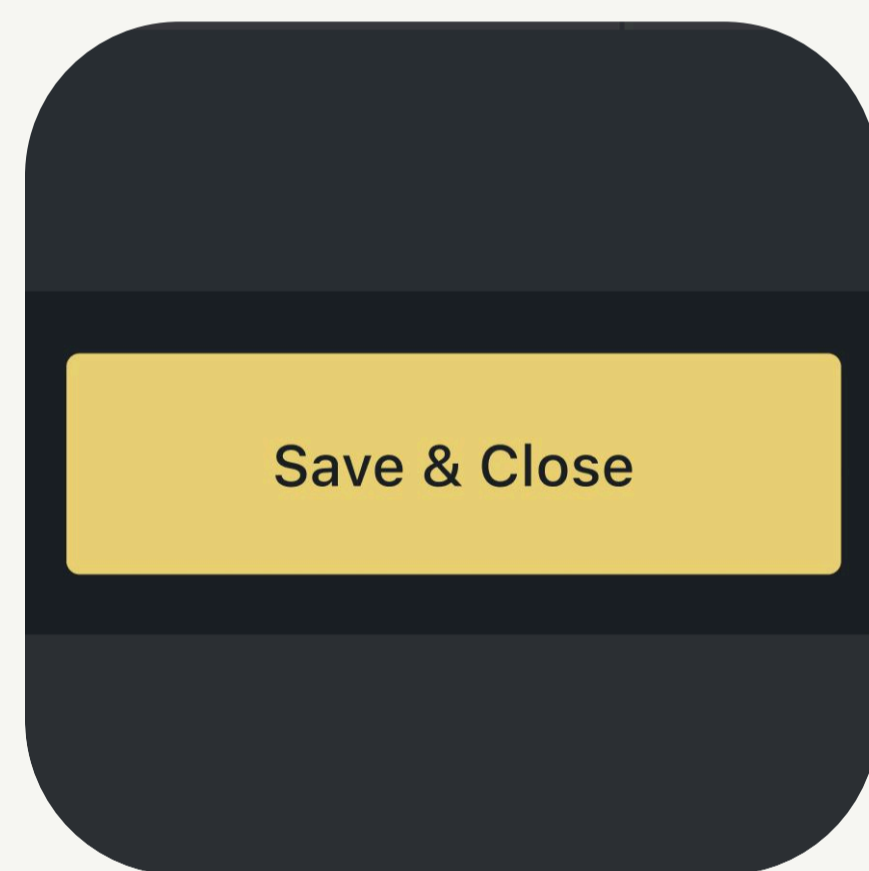

How to track ISBN Barcodes with Orca Scan?

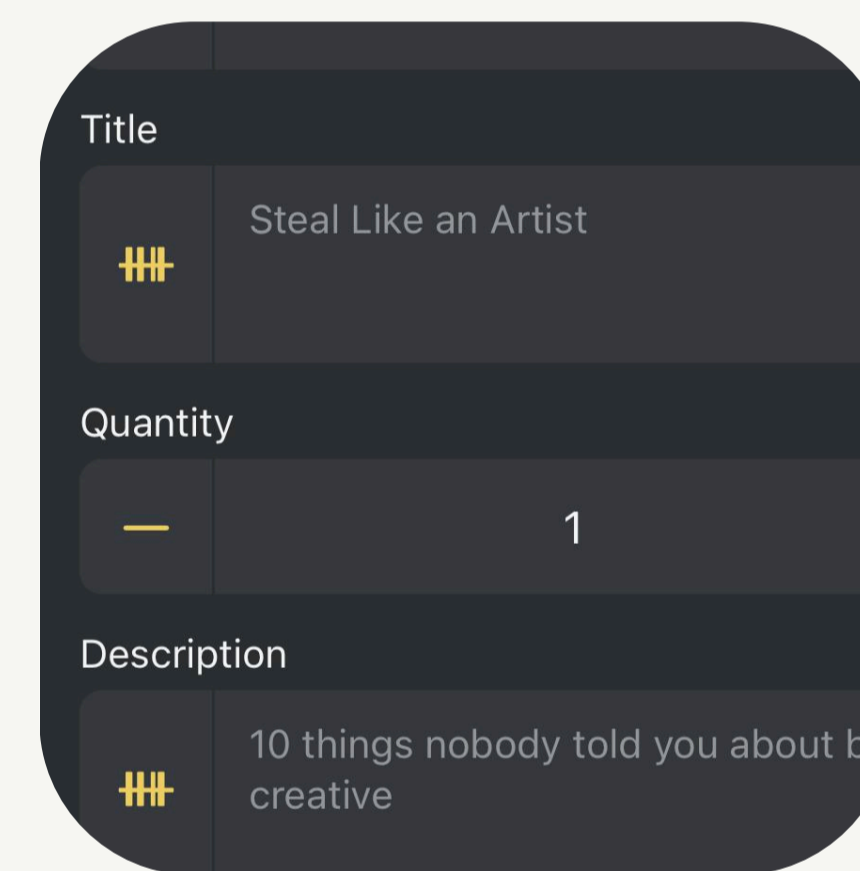

Create a new sheet using the Book Tracking template

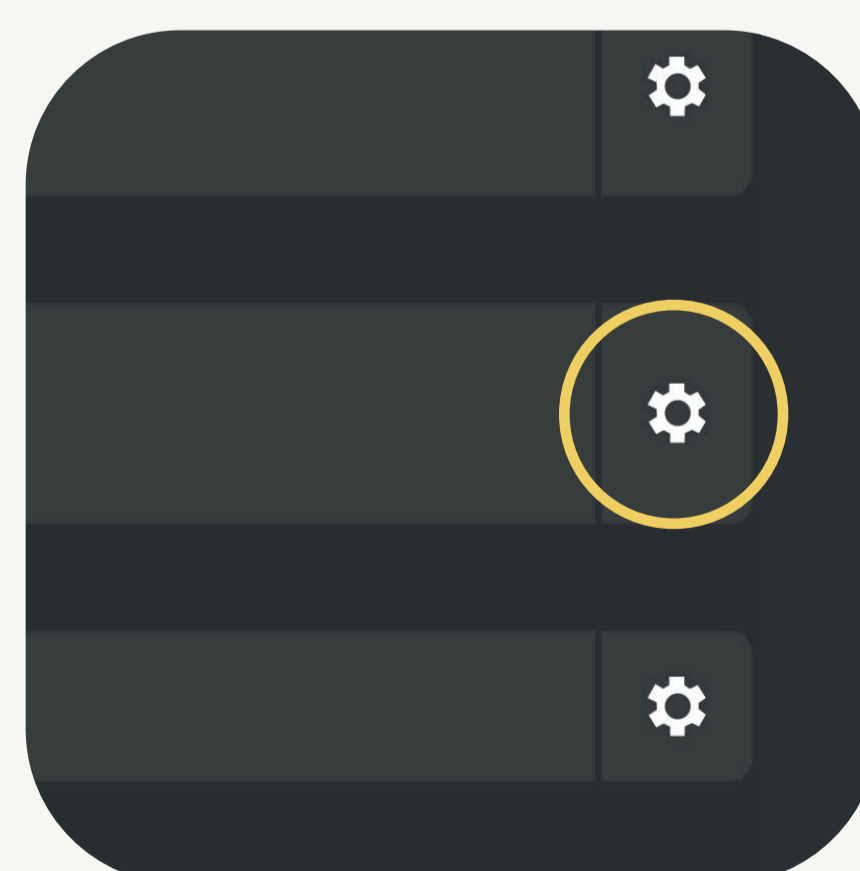

Scan an ISBN barcode on any book
