Why inventory tracking is important?

Inventory tracking helps companies understand what products they have in stock at which location. Inventory typically has a value on a company's books; carrying too much stock can be a risk. Likewise, discovering you do not have an item in stock when a customer or teammate needs it could cost you business.

The Inventory Tracking template turns Orca Scan into an inventory barcode scanner app that can be installed on a iOS or Android-based device, including enterprise barcode scanners from Datalogic, Honeywell, Zebra etc. It contains all the required fields to roll out an inventory management system in minutes. Additional fields can be added to capture more information as needed.

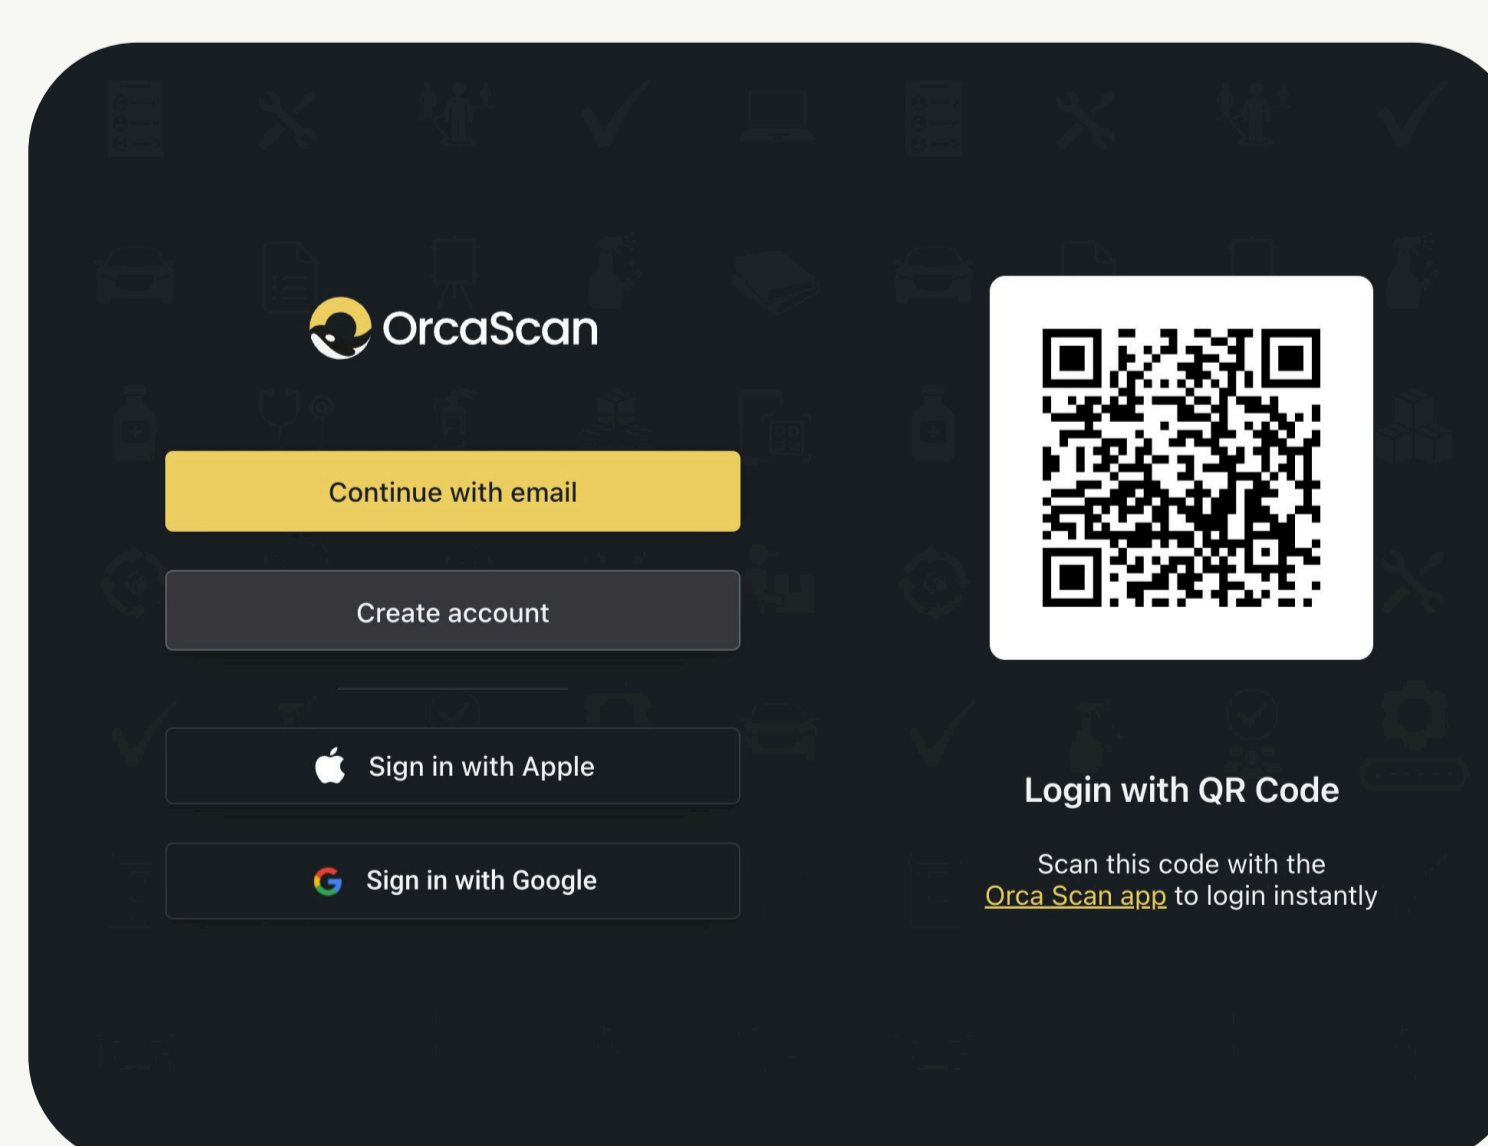

How to install Orca Scan?

Open the camera in
your phone

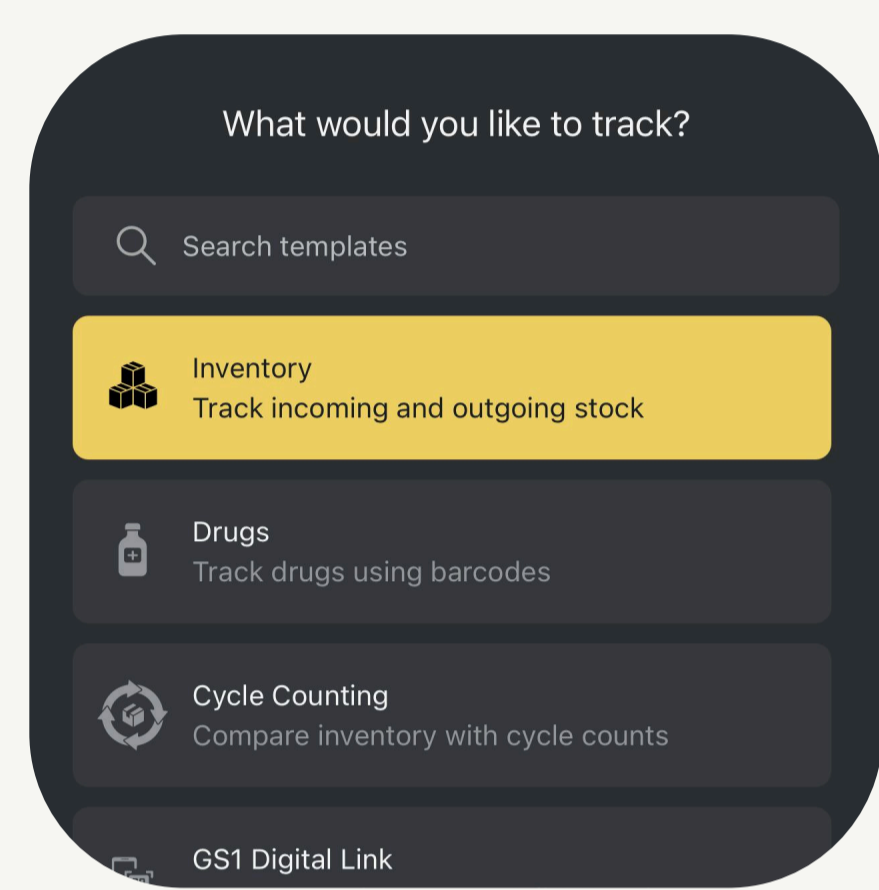

Download the Orca
Scan app

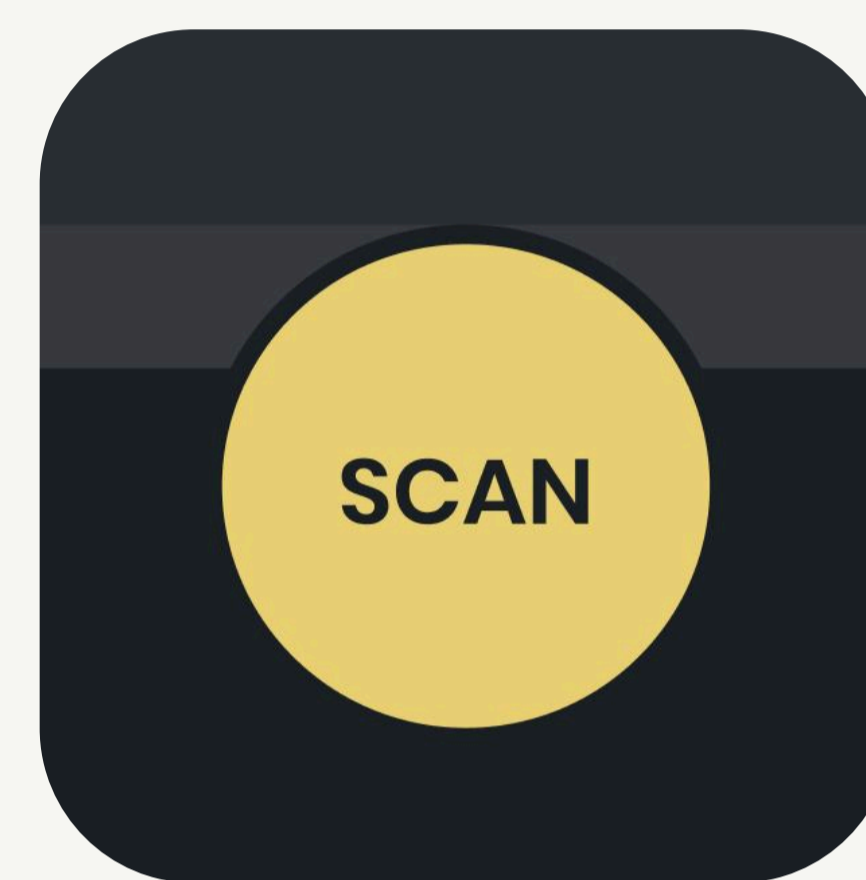

Register for an account

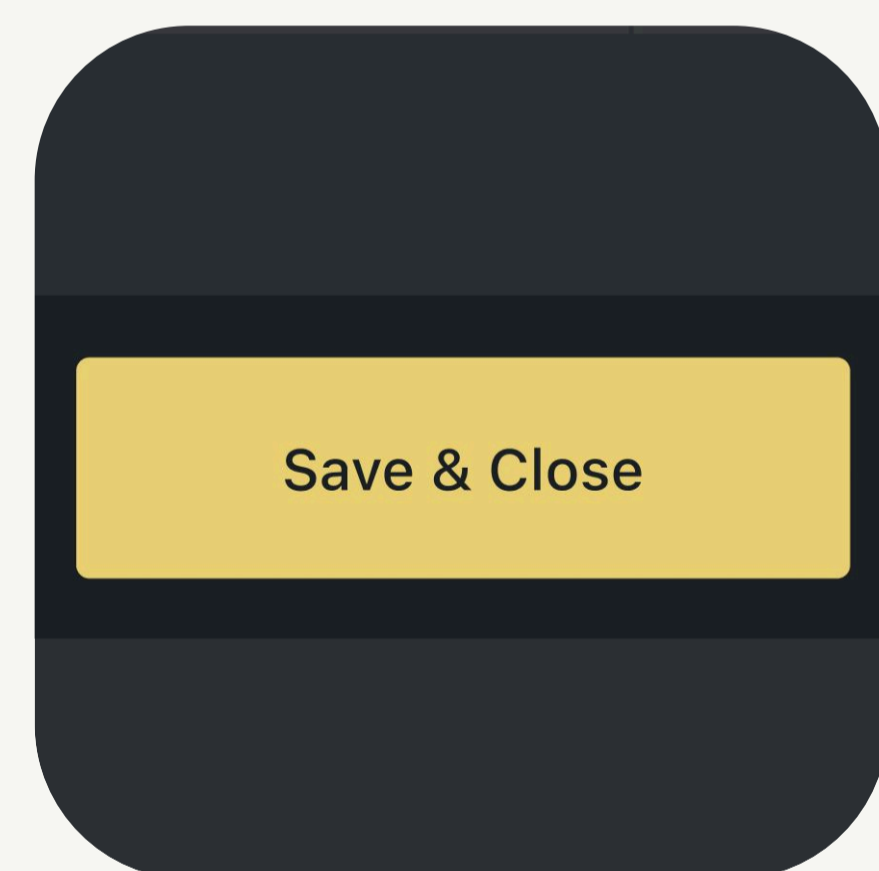

How to track inventory using barcodes?

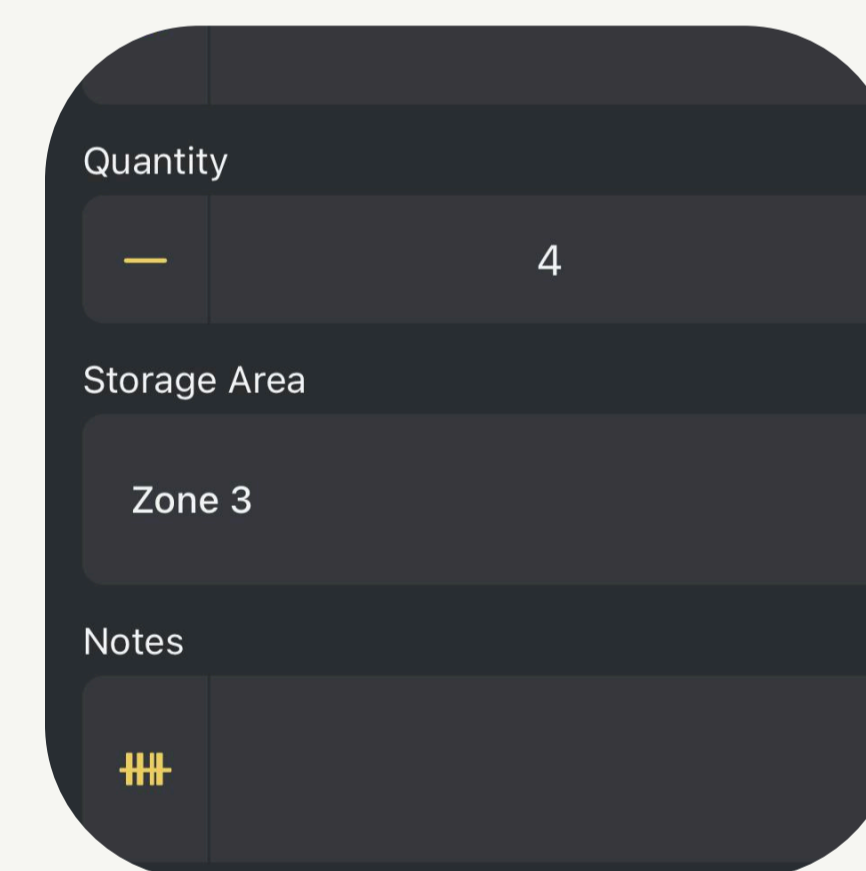

Create a new sheet using the Inventory template

Scan a barcode on a product
